

TRACK AND FIELD

GOLD PACKAGE

FINISHLYNX[®] FULLY AUTOMATIC TIMING SOLUTIONS

Complete with everything needed to host events at the highest levels of state and national competition, the **Gold FinishLynx Package** is ideal for you if your school hosts Track or Cross Country meets through the year.

WHY FULLY AUTOMATIC TIMING (FAT)?

FAT is the standard today by every regulatory body in Track & Field and mandated for record ratification at all levels, including the International Association of Athletics Federations (IAAF) to the National Federation of High Schools (NFHS).

In order to be used to sanction meet results for new state, national and international records, an approved FAT system must:

- Start timing automatically by the signal from the starting apparatus
- Be capable of producing printed images showing times
- Capture timing to a precision of at least 1/100th second

GOLD PACKAGE COMPONENTS

All of your gold package equipment can be upgraded and added on to at any time to move up package levels as your facility's needs change and grow.
